

The CTF challenge this writeup is for is the YouTube adventure

Firstly, we start with a YouTube link <https://www.youtube.com/watch?v=wKz32opINzo>, which is titled quest1, inside the video it shows us a text asking us to help the person to find the flag while in the subtitles is the next YouTube link, but after that there is a maze in the video and the description has a placeholder text hiding the real clue

Red: qxU

Orange: bUB

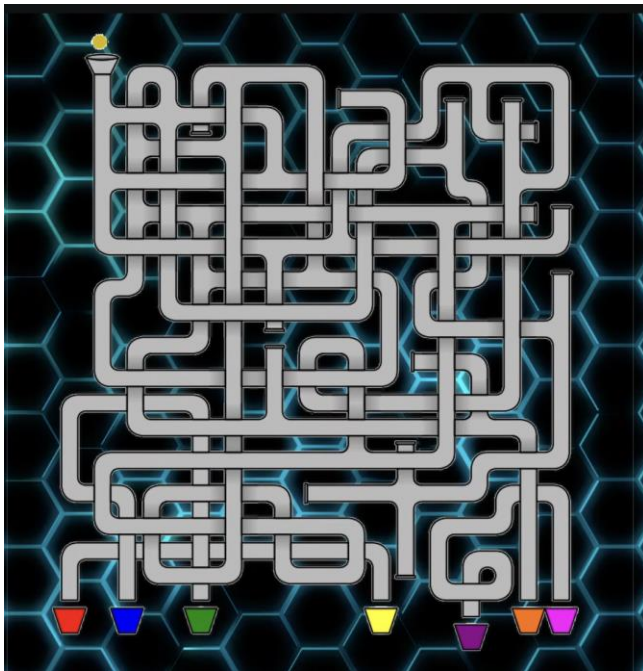

Yellow: sGd

Green: bPA

Blue: mrT

Purple: MTa

Pink: Q==

But we will save this for later, the next video

<https://www.youtube.com/watch?v=p1OGNSLqnZI> named quest 2 comes, in the video we see seven YouTube links being, <https://www.youtube.com/watch?v=7FwDP17XPlk>, which is just Rick Astley's Never Gonna Give You Up,

https://www.youtube.com/watch?v=S8enYup_FaY, which is the 2026 MIT Integration Bee –

Final, https://www.youtube.com/watch?v=Vjf_5VHYy3w, which is the next video quest3,

<https://www.youtube.com/watch?v=vFTeN17Z4rc>, which is the 2017 Raytheon

MATHCOUNTS National Competition,

<https://www.youtube.com/watch?v=tSBWmxwT8So>, which is Tears For Fear's Everybody Wants To Rule The World, <https://www.youtube.com/watch?v=u0Akq3fGknE>, which is LITCTF 2023 | Web Writeup | My boss left, unsecure, Ping Pong, <https://www.youtube.com/watch?v=Mt6RqGP7yJM>, which is MITIT 2025-2026 Winter Contest Closing Ceremony, plus in the second video the subtitles there is two version one the default English saying "Which one is it?", while the English (United States) which says TdD, which will be important later, in quest 3 https://www.youtube.com/watch?v=Vjf_5VHYy3w, we see a 10 second glitch screen which at the bottom of the description hides the link of the next quest, and at 7 seconds a part of the screen darkens showing NyM which is still important later, at quest4 https://www.youtube.com/watch?v=znqPQdxS_8U, we see an action movie like 5 second montage, the next YouTube link is hidden in the thumbnail and in the comments section someone posted TAx, still important later, quest 5 <https://www.youtube.com/watch?v=bZjgdbGZIEM>, it contained morse code which using a morse code decoder (the one I used is here: <https://morsecode.world/international/decoder/audio-decoder-adaptive.html>), gave us the next YouTube link, and at 15 seconds we see fQ in the video important later still. Quest 6 <https://www.youtube.com/watch?v=R3x8SMCUQzk>, shows us some text saying we found the last video, but the flag was split in half and separated within the videos. The first half was LITCTF {y0uTuB3, which at the last part of the video we see ==. Now in the first video we see that the maze's exit is clearly the orange cup because the other inputs into the other cups just loop to another cup's input, which the orange cup is the correct color which we get bUB, which adding it all up together the six videos text we get, bUBTdDNyMTAx fQ ==, which is a base64 encoding (I use this tool, it is helpful especially for multiple layer's encryption: <https://gchq.github.io/CyberChef/#oeol=FF>) which will translate into m@St3r101}, the last part of the flag, which the flag is LITCTF{y0uTuB3m@St3r101}.
